

Newsletter 4th Qtr 2022

Everyone is looking for ways to save money and make a profit. When you choose remanufactured products you can save from 10 to 50% off the cost of new depending on the product.

Whenever I look at getting a new printer, I always check to see what options are available for the supplies before I make the purchase so I don't get stuck with an inexpensive piece of equipment and very expensive supplies.

If you want to print in color the laser printers cost less per page to print than the inkjet but a lot of people go with the inkjet as the cartridges are less than \$50.00 but you are paying a much higher cost per page. There are a lot of inexpensive laser printers out there with toners below \$75.00 so it is making it easier for people to see the cost benefits of the laser printer over the inkjet printer.

When you purchase remanufactured cartridges, a large percentage of them are done in the USA so you are helping to stimulate the economy by keeping jobs in the USA. When you buy a new cartridge, most of them are made overseas so we aren't helping our economy.
